PERSONAL PROJECTS

React Portfolio
○ This is a project in which i have created my own responsive personal portfolio .To create this project i have used **React js , Tailwind Css**

Movie Review Website
○ This is a api based **react** web app in which user can Search movie , Finding Trending movie ,and also can check for new realised movie review.In this project I have used **tailwind css** with **React js**

Wether App Using Javascript
○ In this project i have use wether api to display real time weather update on any entered location by user.

Random password generator
○ In this project i use maths.random function of javascript to create a random 16 digit strong password. Every time user will refresh the website it got the unique password.

Text utilizer
○ Apart from creating Full website i have created a text utilizer app using core javascript in which i have add functionalities like word, sentence counter , upper & lower case converter etc

Random Jokes Chrome extension
○ Using **Javascript** i have intregrate one joke api which display a new random joke every time user click on the chrome extension

News website
○ In this project i have used a news API using which daily new will be update. In this website news are listed according to category. For now there is only 4 category of news are listed.
